About

Experienced in machine learning and data science with proven track record in research and implementation. Demonstrated expertise through multiple published papers and industry collaborations. Seeking Software Engineering, Machine Learning, and Firmware Development roles.

Education

National Taiwan University, MS in Data Science, College of Electrical Engineering and Computer Science Sep 2024 – Present

- MIRLAB (Multimedia Information Retrieval Lab)
- GPA: 3.93/4.3
- **Courses:** Machine Learning, Information Retrieval and Extraction, Computer Vision Practice with Deep Learning
- **Ongoing Courses:** Natural Language Processing, Multimedia Security, High-Performance Big Data and Artificial Intelligence Systems

Soochow University, BS in Data Science Sep 2020 – June 2024

Projects

Collect dialysis clinical data and establish a model of chronic kidney disease Sep 2024 - Present

- Developing an end-to-end monitoring system for predicting Intradialytic Hypotension risk in dialysis patients, optimizing and balancing True Positive Rate and True Negative Rate to achieve optimal clinical effectiveness. A version of this system has already been deployed in the hospital.
- Collaborated with National Taiwan University Hospital

Revenue forecasting based on machine learning techniques Nov 2023 - Dec 2024

- Applying ML techniques with expert forecasts for 6-month revenue prediction, achieving 1.5x performance improvement when incorporating expert input for the upcoming month.
- Collaborated with MediaTek Inc.

Publications
